SUPERINTENDENT'S REPORT

TO THE CITIZENS OF WESTON:

No radical change has been made in our schools during the past year, and, with few exceptions, the work has gone on smoothly and pleasantly. Seven legal schools have been maintained, and ten different teachers employed.

The attendance has improved during the past year, but it is still far below what it should be. In some cases, nearly all the absent and tardy marks are due to only two or three pupils. A table showing the enrollment, absences, tardy marks, dismissals, and per cent of attendance accompanies this report. A few words may not be out of place here regarding school attendance. No person has the legal right to keep out of school any pupil between the ages of eight and fifteen years, or a pupil between the ages of five and eight years or over fifteen years who has been enrolled in schools, provided, of course, that the pupil is physically and mentally fit to attend school. In certain cases, the directors and the superintendent have the right, under the law, to excuse a pupil. The teachers are required by law to report absences, and are liable to a fine if they neglect their duty. The truant officer also is liable to a fine if he does not attend to cases of truancy reported to him. The teachers and school officials should receive the support of all our citizens in enforcing the laws of our state. Mr. Winship and Mr. Coburn have been faithful and efficient in the performance of their duties.

The plan of grading the district schools has worked well and has given satisfaction in most cases. As far as possible, the district schools are doing the same work as the grades. Teachers' meetings have been held at the

opening of each term and the work for that term discussed and outlined.

The district schoolhouses need much attention. Some repairs have been made this year, but more are needed. The village schoolhouse needs a coat of paint; whether other needed repairs and improvements can be made depends on the action of the voters at town meeting.

Nearly two years ago, Weston voted to maintain a high school with a two years' course. Such a school has been maintained, and excellent work has been done. Practically all of the present members of the school complete their course in June. The entering class next fall will be small. There is no doubt that it will cost more to maintain a high school than it would to pay the tuition of the pupils who might go away to school. It is equally true that more of the boys and girls will attend a high school if there is one in town than will do so if they have to go out of town. It is simply a question of what the town can afford to do for the young people.

Your superintendent has made over eighty visits during the year, held three teacher's meetings, and assisted the directors and teachers in various ways.

Respectfully submitted,

E. H. DORSEY
